

Matrix42 Compliance

Absolutely compliant IT asset management

Matrix42 Compliance helps you track usage, ensure compliance and optimize expenditure for all your hardware, software and service licenses and contracts.

Simple, transparent and cost-effective

Three reasons to prioritize IT Asset Management and Compliance

1

Vendors are auditing more:

According to different analysts the proportion of organizations audited for software compliance increased from 33% to more than 65% recently.

2

Organizations are wasting money on unused software

Research firm Opinion Matters reports that 23% of new software never gets used, and the total value of unused and installed software averages \$400 per computer!

3

IT asset management programs save money:

10-20% of total IT costs in the first year, say leading international business analysts.

Key Features

- Contract lifecycle management
- Asset lifecycle management
- License lifecycle management
- Flexible hardware and software inventory
- Comprehensive software recognition
- Integrated self-service Enterprise App Store (Matrix42 Service Catalog)
- Automatic tracking and alerts
- Full compliance management across physical, virtual, mobile and cloud environments
- Embedded collaboration

One integrated solution to deliver it

Matrix42 Compliance, is a single, integrated IT asset management solution that helps to mitigate the risks of a non-compliant IT infrastructure, while optimizing your software and hardware costs, and delighting your users with tailored IT they can rely on.

KPMG's SAM Tool Assessment

KPMG assessed SAM Tool

8.x

Did you know?

Matrix42 Compliance is certified by KPMG Germany.

Did you know?

The Matrix42 License Intelligence Service (LIS) cloud automatically recognizes more than one million different application fingerprints.

Matrix42 Compliance

Everyday IT Asset Management tasks made easy

Unauthorized deployment detection

A user installs an unauthorized application.

Matrix42 Compliance automatically:

- Reports that the installation has occurred.
- Determines whether a license is required.
- Informs the license administrator.
- Enables the license administrator to send a software removal request with a single click.

Software request and approval

A user wants to install an application from the Matrix42 Service Catalog.

Matrix42 Compliance automatically:

- Notifies the relevant manager and enables fast approval or rejection.
- Activates the installation with no IT intervention needed.
- Keeps the user informed and delighted with fast, efficient IT service.
- Reconciles license compliance for each respective software product.

License compliance accounting

A license administrator wants to check compliance status and identify opportunities for cost optimization.

Matrix42 Compliance enables the admin to:

- Check authorization against requirements based on a consolidated view of deployment and usage.
- Check for missing licenses, identify unused licenses, and find other potential costefficiency opportunities such as purchasing products by suite.
- Record new license purchases and capture relevant data.
- Approve the new compliance status and send an update to managers.

Your benefits

1

Maximize user satisfaction

- Enable user self-service without risking compliance breaches.
- Maximize users' productivity and satisfaction by ensuring they have access to the latest compliant and automatically updated versions of the software they need.

2

Optimize your software and hardware costs

- Optimize inventory with an accurate audit of assets, how they are being used and by whom.
- Stop paying for software and hardware that isn't being used.
- Ensure timely renewals and prevent unnecessary ones through proactive notification of deadlines.
- Renegotiate licenses and contracts with vendors based on actual requirements.

3

Reduce risk and gain complete peace of mind

- Avoid the financial risks of compliance failures.
- Free up resources by reducing the effort of compliance fulfillment.
- Ensure control and transparency with accurate usage, compliance and cost information on demand.

30%

That's the proportion of your organization's software costs that you can save by eliminating unused and underutilized applications.
